HIDI

Advantage Fundamentals
Multistate Data Exchange Program

UNIQUE NATIONWIDE PROGRAM

Hospitals understand that every patient receiving care outside their facility directly impacts the bottom line. The ability to **scrutinize patient out-migration** — for which services, where and why — is crucial to your respective members' marketing and financial objectives.

The Hospital Industry Data Institute's **Multistate Data Exchange Program** is the premier out-of-state data exchange program in the nation. Participating states receive patient data on their state's residents that receive medical treatment in another state. Serving as a single data repository, HIDI collects, aggregates and coordinates the exchange of this data amongst participating state hospital associations on a quarterly basis.

See The Bigger Picture

All states participating share inpatient data and a subset of of those states share ambulatory surgery data. 2025 participants include:

ALABAMA	KANSAS	NEBRASKA	VIRGINIA
ARKANSAS	MICHIGAN	NORTH CAROLINA	WEST VIRGINIA
GEORGIA	MINNESOTA	OKLAHOMA	WISCONSIN
ILLINOIS	MISSOURI	SOUTH DAKOTA	WYOMING
IOWA	MONTANA	TENNESSEE	

More Data, More Insights

Current data fields available for exchange include:

› HOSPITAL ID	› COUNTY	› MDC	› PRINCIPAL,
› SUBMISSION STATE	› ZIP CODE	› DISPOSITION	SECONDARY
› DISCHARGE YEAR	› AGE	› PAYER	PROCEDURE AND
› DISCHARGE MONTH	› SEX	› ATTENDING	DIAGNOSIS CODES
› ADMIT TYPE	› RACE	PHYSICIAN	› LENGTH OF STAY
› ADMIT SOURCE	› DRG		

Additional Data Sharing Opportunities

Serving as a neutral data convener, HIDI collects, aggregates and coordinates the exchange of data amongst participating state hospital associations for a variety of needs. Connect with us to discuss a customized data exchange solution!

Better Data. Better Decisions.
